

# Free Cyber Security Seminars

## ***Seminar #1 – PC Security – A Closer Look at PC Intrusions and How to Stop Them***

Malware, spyware, spear phishing, attack vectors...what's the latest in PC Security attacks? Fight back with this Technology Seminar on how to secure, protect and prevent your computer from being infected.

## ***Seminar #2 – Are You Ready to Move Into the Cloud? – A Basic Introduction to Cloud Computing***

Many companies and individuals are migrating from applications on their local computers to applications that run over the network, located in a “cloud” of resources. Learn about its history, how it works, security issues associated with it, and how this will impact the future of computing.

## ***Seminar #3 – Portrait of a Network Intrusion: Examining Current Attacks and How to Prevent Them***

Learn how attacks can compromise a network, and what can be done to defend against this growing threat. Network Intrusion Detection (NIDS), Host Intrusion (HIDS) systems and mitigation actions will be examined as part of the overall information defense.

***These seminars are free  
and open to the public  
No registration is necessary***

***PC Security, a Closer Look at PC Intrusions, and How to Stop Them***

March 15, 7 pm  
CALT 100

***Are You Ready to Move Into the Cloud? A Basic Introduction to Cloud Computing***

April 21, 7 pm  
CALT 100

***Portrait of a Network Intrusion: Examining Current Attacks and How to Prevent Them***

May 11, 7 pm  
CALT 100

*These seminars are sponsored by the Computer Technologies Department at Anne Arundel Community College to provide information to the general public about issues related to computer security.*
